**Daily bulletins appear below, the first issued, at the bottom. This PDF file name includes the date of the first issue in the format yy/mm/dd, a format that sorts file storage in chronological order. As this market is updated daily, a new chart is added to the top. This file is replaced each 2-3 weeks, or as necessary owing to market changes and contract rolling. The commentary box is only changed when market conditions warrant, which may not be each day. Prior notice is given of any impending breaks in daily delivery, which are kept to a minimum.**

**Below the Hi-TechCharts is our EOC chart, a daily chart identifying the bull to bear, and bear to bull cycles, these being the complete cycle. An overview of our EOC cycle is included in our Tutorial, (email us for a copy [markethotspots@gmx.com](mailto:markethotspots@gmx.com)) but for Users to get the best results by marrying EOC cycles to elliptical cycles in Hi-TechCharts, we recommend emailing us for a copy of George Bayer's 'The Egg of Columbus' from which the EOC analysis is derived.**

**SP500 MARCH SCALE: 21**  
**ISSUED: 19 MARCH 2025 LST**  
**EOC STATUS: BEAR**  
 ©2025 www.hi-techcharts.com

All indications are that the top of 11<sup>th</sup> December 2025 (hitting IC1) represents the end of the bull market that has been running since the October 2022 bottom. A bear market is apparent based on the angle of the blue C lines, which represent the angle of trend that will control price action for at least 6 months. Week commencing 22<sup>nd</sup> December is critical since price is up against powerful resistance at IC1 & IC2. While closes remain below IC1 SP500 will trade in the IC1/IC3 channel through January. It is possible price could break up to top out at target 2 (8<sup>th</sup> January at 7010) but time is against this. SP500 will need to be down at the C lines (C3 - C5) by February.
