Any unauthorized use or dissemination or any action taken or omitted to be taken in reliance on it, is prohibited and may be unlawful. This information contained within is not to be construed as an offer to sell or a solicitation or an offer to buy commodity futures or options. Futures trading involves the substantial risk of loss and is not suitable for all investors.

Daily bulletins appear below, the first issued, at the bottom. This PDF file name includes the date of the first issue in the format yy/mm/dd, a format that sorts file storage in chronological order. As this market is updated daily, a new chart is added to the top. This file is replaced each 2-3 weeks, or as necessary owing to market changes and contract rolling. The commentary box is only changed when market conditions warrant, which may not be each day. Prior notice is given of any impending breaks in daily delivery, which are kept to a minimum.

Below the Hi-TechCharts is our EOC chart, a daily chart identifying the bull to bear, and bear to bull cycles, these being the complete cycle. An overview of our EOC cycle is included in our Tutorial, (email us for a copy markethotspots@gmx.com) but for Users to get the best results by marrying EOC cycles to elliptical cycles in Hi-TechCharts, we recommend emailing us for a copy of George Bayer's 'The Egg of Columbus' from which the EOC analysis is derived.

Gold is in steep up cycles (C line angle). From the top on 17th October, (occurring at HEC, extreme upper price limit, and at two EM cycles (coloured triangles)) price was destined to hit targets 2 & 3. Gold is now at a critical position, strongly supported by the cluster of C lines. M1 is a powerful resistance line and once price crosses to the right side, Gold is free to run up to M2.

GOLD DECEMBER SCALE: 13.0
ISSUED: 22 October 2025 LST
EOC STATUS: TAW

 In Hi-TechCharts

Gold is in steep up cycles (C line angle) but a significant pull back is underway. The ending IC3 cycle is an attraction zone and M1 & M2 are down force lines. M1 is capable of forcing price down to targets 3 and 5. Once price is above M1 Gold is free to move up again. Target 6 is possible. Price action below C4 would likely indicate a fall to target 5.
