Daily bulletins appear below, the first issued, at the bottom. This PDF file name includes the date of the first issue in the format yy/mm/dd, a format that sorts file storage in chronological order. As this market is updated daily, a new chart is added to the top. This file is replaced each 2-3 weeks, or as necessary owing to market changes and contract rolling. The commentary box is only changed when market conditions warrant, which may not be each day. Prior notice is given of any impending breaks in daily delivery, which are kept to a minimum.

Below the Hi-TechCharts is our EOC chart, a daily chart identifying the bull to bear, and bear to bull cycles, these being the complete cycle. An overview of our EOC cycle is included in our Tutorial, (email us for a copy markethotspots@gmx.com) but for Users to get the best results by marrying EOC cycles to elliptical cycles in Hi-TechCharts, we recommend emailing us for a copy of George Bayer's 'The Egg of Columbus' from which the EOC analysis is derived.

Gold is in steep up cycles (C line angle) but a significant pull back is underway. The ending IC3 cycle is an attraction zone and M1 & M2 are down force lines. M1 is capable of forcing price down to targets 3 and 5. Once price is above M1 Gold is free to move up again. Target 6 is possible. Price action below C4 would likely indicate a fall to target 5.
