Futures trading involves the substantial risk of loss and is not suitable for all investors.

Daily bulletins appear below, the first issued, at the bottom. This PDF file name includes the date of the first issue in the format yy/mm/dd, a format that sorts file storage in chronological order. As this market is updated daily, a new chart is added to the top. This file is replaced each 2-3 weeks, or as necessary owing to market changes and contract rolling. The commentary box is only changed when market conditions warrant, which may not be each day. Prior notice is given of any impending breaks in daily delivery, which are kept to a minimum.

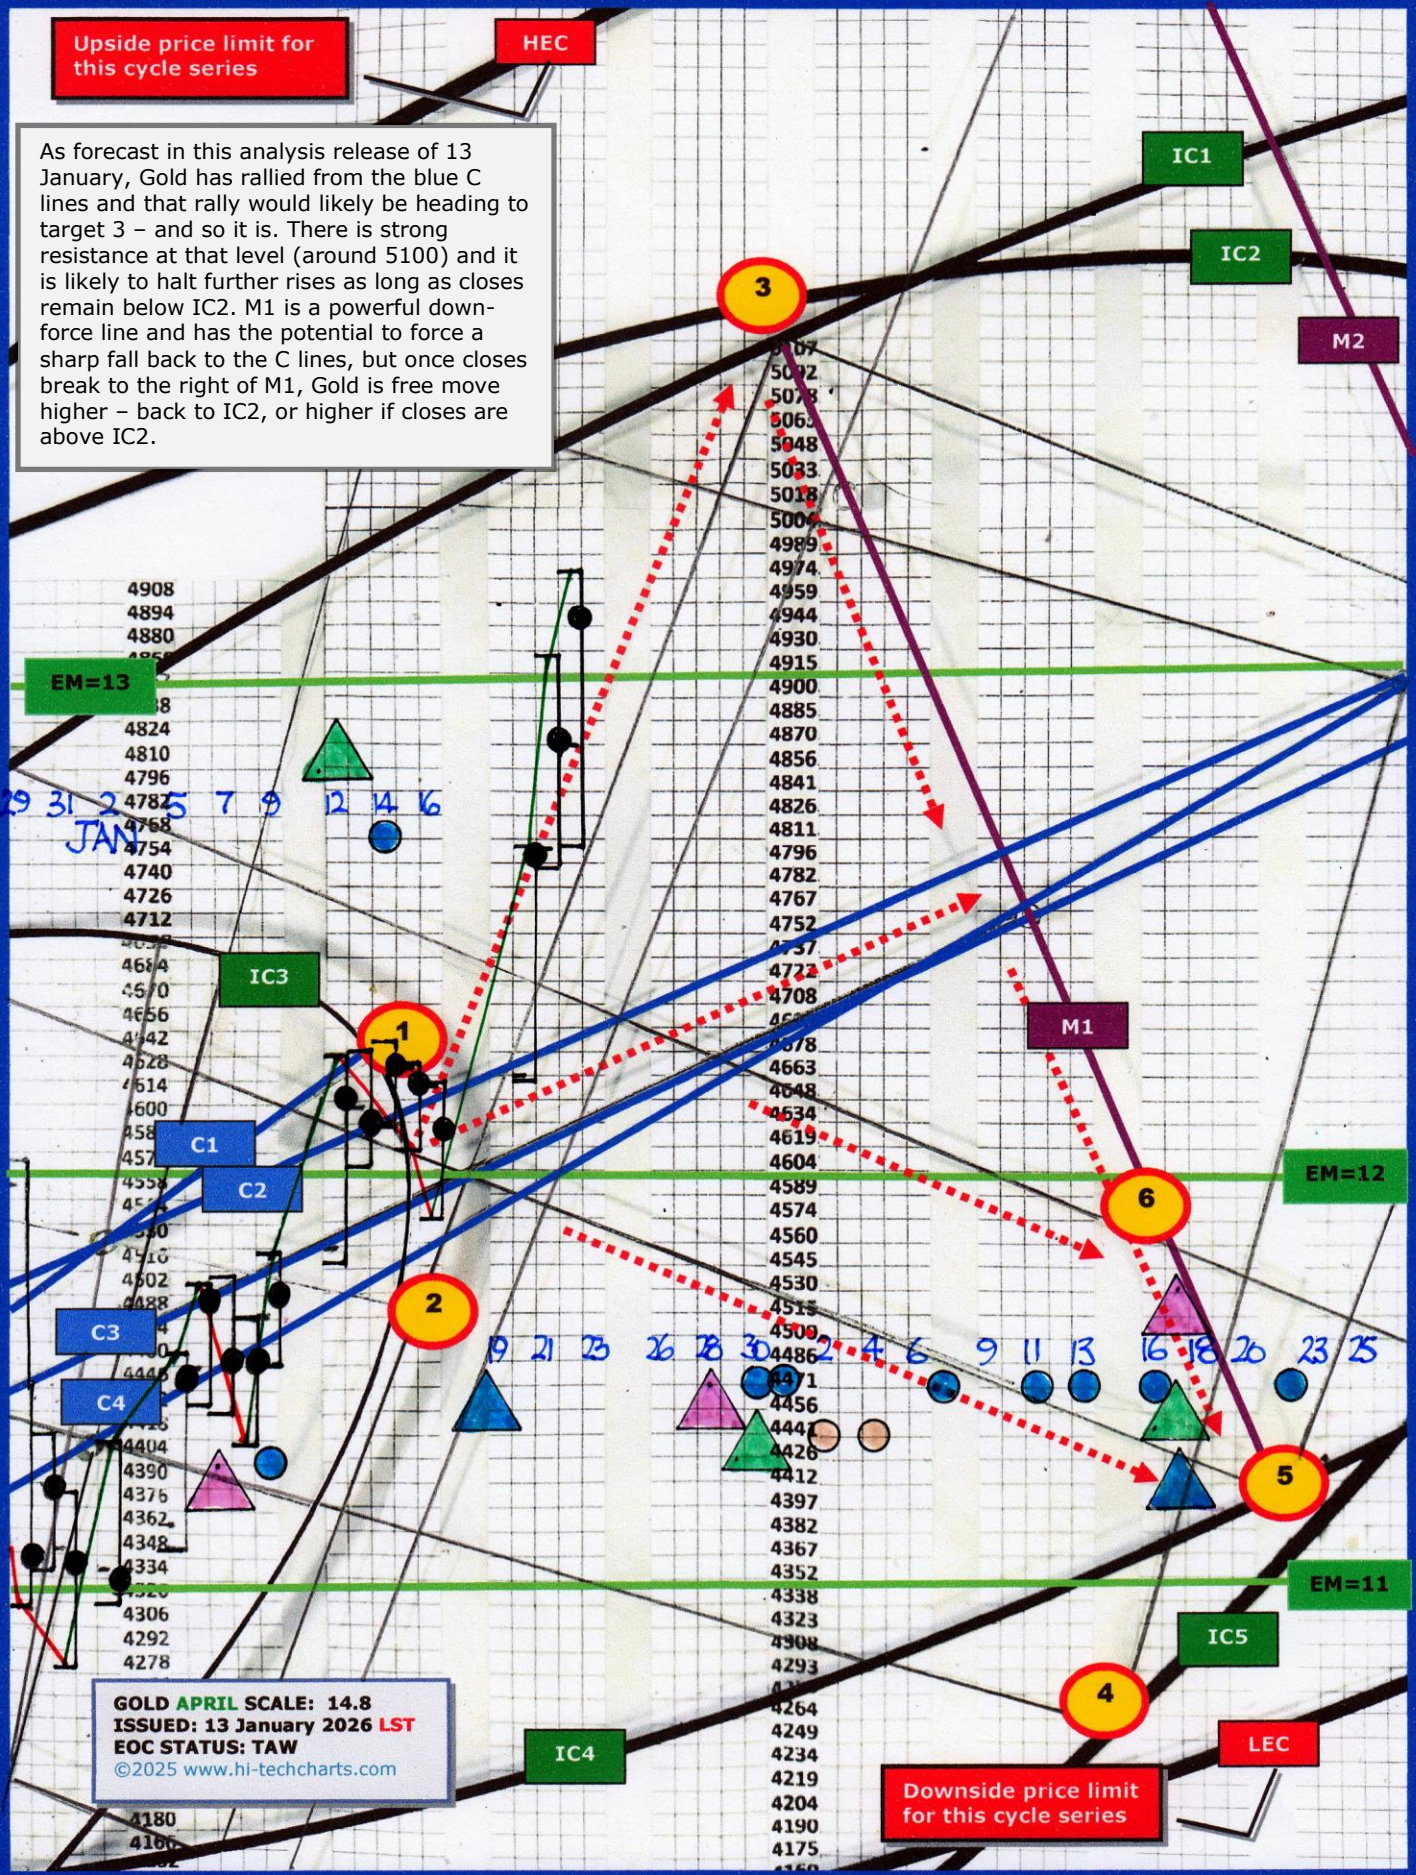

Below the Hi-TechCharts is our EOC chart, a daily chart identifying the bull to bear, and bear to bull cycles, these being the complete cycle. An overview of our EOC cycle is included in our Tutorial, (email us for a copy markethotspots@gmx.com) but for Users to get the best results by marrying EOC cycles to elliptical cycles in Hi-TechCharts, we recommend emailing us for a copy of George Bayer's 'The Egg of Columbus' from which the EOC analysis is derived.

HEC

As forecast in this analysis release of 13 January, Gold has rallied from the blue C lines and that rally would likely be heading to target 3 - and so it is. There is strong resistance at that level (around 5100) and it is likely to halt further rises as long as closes remain below IC2. M1 is a powerful down-force line and has the potential to force a sharp fall back to the C lines, but once closes break to the right of M1, Gold is free to move higher - back to IC2, or higher if closes are above IC2.
