Daily bulletins appear below, the first issued, at the bottom. This PDF file name includes the date of the first issue in the format yy/mm/dd, a format that sorts file storage in chronological order. As this market is updated daily, a new chart is added to the top. This file is replaced each 2-3 weeks, or as necessary owing to major changes and contract rolling. The commentary box is only changed when market conditions warrant, which may not be each day. Markets are updated a minimum of 48 weeks per year. Prior notice is given of impending breaks in daily delivery.

Below the moneymakingcharts is our EOC chart, a daily chart exposing the bull to bear, and bear to bull cycles, these being the complete cycle. An overview of our EOC cycle is included in the Tutorial but for Users to get the best results by marrying EOC cycles to elliptical cycles in moneymakingcharts, we recommend emailing us for a copy of George Bayer's 'The Egg of Columbus' from which the EOC science is derived.

NASDAQ 100 - 29th Oct 2025

If Nasdaq remains in this cycle series, we expect a bull market top to form at HEC, the upper cycle limit. EM=12 is 12 cycles up from the 12th October 2022 bear market bottom - 12 cycles is around the historical high for Nasdaq. Intra-day price may extend up to EM=12 but only for 2-3 days maximum. Nasdaq is likely to occupy the HEC/IC2 channel for a period but not beyond December. The initial fall in a new bear market will take price to the C lines and eventually below 21100.
